

Alogent Check Processing Suite: End-to-End Capabilities

Alogent's proven end-to-end check and payment processing solution drives institutional loyalty and user engagement for total efficiency across full- and self-service channels, and institutions of all sizes.

Deployable in hosted and on-premise environments, Alogent Check Processing delivers scalable, secure, and intuitive solutions for banks and credit unions.

TAKE CONTROL OF ITEM PROCESSING

Alogent Clearing, Returns and Chargebacks simplifies and streamlines Day One and Day Two item processing, boosting employee productivity, turnaround time, and accuracy. Take control of your payment workflows with sophisticated forward presentment capabilities, coupled with fraud-detection and management tools for inclearings and returns. Eliminate third-party processing and gain powerful visibility into enterprise-wide user behavior, fraud statistics, and trends with add-on capabilities that integrate with Alogent's entire check processing suite.

FULL RANGE OF REMOTE DEPOSIT CAPABILITIES

Remove inefficiencies and increase account holder engagement by delivering total flexibility within the remote channel.

With Alogent's solutions for mobile deposit, merchant capture, and image-enabled ATMs, ITMs, and kiosks, consumer and business account holders can bank when and where convenient.

SCALABLE & SECURE

- Protection across all channels for improved risk mitigation at the point of presentment
- Real-time defense against fraud and counterfeits, with the ability to implement fully-customizable business rules
- Receive instant notifications of potentially uncollectable items
- Streamlined item processing workflows

IN-BRANCH AUTOMATION & EFFICIENCY

Alogent Teller and Branch expedite the in-branch check capture process, promoting productivity and accuracy, while reducing errors and costs associated with manual processes.

Capabilities for Clearings, Returns and Chargebacks perform cross-channel, real-time duplicate detection, and comprehensive image quality (IQA) and image usability analysis (IUA), allowing branch teams to make corrections on-the-spot.

Ensure batches are clean before leaving the institution, reducing exceptions and additional fees. With superior archiving, search and retrieval capabilities for current and legacy items, Alogent enables real-time, permission-based access to check image data.
